CUSTOMIZED BURNERS SOLUTIONS FOR ANY TYPE OF APPLICATION

OUR EXPERIENCE

Thanks to almost 50 years of experience in the design and production of burners, Ecoflam offers a full range of blown air pressure jet burners covering an extremely wide range of power, from small products for residential heating applications to high power burners dedicated to the industrial segment.

Ecoflam burners are renowned worldwide for providing high efficiency and reliable operation with significant energy savings and feature extreme ease of installation, maintenance and flexible boiler-burner matching.

OUR MISSION

Following a philosophy of continuous improving, the R&D Laboratory is constantly working to produce better results, such as the reduced NO_x level emissions. The development of new advanced combustion technologies allows to propose solutions in respect of the most stringent environmental regulations and to create the perfect condition to face the new upcoming market requests, such as Ultra Low NO_x performance and ErP-ready products.

OUR PRODUCT RANGE

The flexibility of Ecoflam solutions allows the manufacturing of highly customized products covering a range from 17 kW to 34 MW:

MAX GAS

Gas range
17 - 700 kW

BLU

Gas range
245 - 17000 kW

MAX

Light oil range
18 - 546 kW

MAIOR

Light oil range
300 - 17000 kW

MAXFLAM/OILFLAM

Heavy oil range
68 - 17000 kW

OUR PROFESSIONAL TEAM

Ability to design state-of-the-art burners, manage demands of products for specific applications, ability to solve problems in real time are just some of the characteristics of our technicians and engineers.

But not only: Ecoflam has a worldwide network of service technicians able to support the installation, the commissioning and the periodic maintenance activities of the burner.

OUR INTERNATIONAL APPROACH

Our products are designed, developed and manufactured in Italy, combining quality, reliability and high performance. All these features are necessary for the end-user satisfaction, which is the first target for Ecoflam. Reaching this outcome throughout its extensive worldwide network of distributors and customers has always been a challenging task for Ecoflam, which was achieved only by developing a close and personalized relationship with each customer, always taking into account the needs and the distinctive characteristics of each individual market.

MULTICALOR

Dual fuel (gas/light oil)
190 - 17000 kW

MULTIFLAM

Dual fuel (gas/heavy oil)
414 - 17000 kW

TS RANGE

All fuels
230 - 34000 kW

SPECIAL VERSIONS

MAX GAS

MONOBLOCK GAS BURNERS FROM 17 TO 700 kW

RANGE OVERVIEW

Low NOx Class 3 (NOx ≤ 80 mg/kWh)

Low
NOx
Class **3**

MAIN FEATURES

- Two stage PAB models available with different burner controllers, with or without digital informative display
- High efficiency fan ventilation system (HPV) allowing easy burner-boiler matching even with high combustion chamber pressure
- Combustion head easy to assemble and adjust
- The hinge flange allows easy access to the combustion head without losing the original settings (starting from MAX GAS 350)
- All models are available to work with 50 and 60 Hz electrical frequency

High efficiency fan ventilation system (HPV)

CONFIGURATIONS

MAX GAS range is available in the following operation modes:

MAX GAS ... P	MAX GAS ... PAB	MAX GAS ... PR
One stage Low NOx Class 3	Two stages Low NOx Class 3	Two stage progressive/modulating mechanical Low NOx Class 3
All models	MAX GAS 120 ... 700	MAX GAS 350 ... 700

Other available configurations:

- Progressive versions are available starting from model MAX GAS 350 and can be transformed into modulating with an optional kit
- LPG versions
- Continuous ventilation versions
- High temperature versions
- OEM and other special versions on request according to feasibility

FUEL

- Natural gas (G20, G25 according to EN676)
- LPG

EMISSIONS

Class	NOx mg/kWh
1	170
2	120
3	80

All models are in compliance with EN 676 European Standard

CONFORM TO

All products are in accordance with the following directives:

- 2014/35/EU Low Voltage Directive
- 2014/30/EU EMC Directive
- 2016/426/EU Gas Appliance Regulation
- 2006/42/EC Machine Directive

- Fuels: natural gas, LPG
- Operation: one stage;
- Emission class: Low NOx class 3 (≤ 80 mg/kWh) according to EN676
